

Central and Eastern Europe, Middle East and Africa Semiannual High-Speed Hardcopy Peripheral Tracker

IDC's *Central and Eastern Europe, Middle East and Africa Semiannual High-Speed Hardcopy Peripheral Tracker* covers all digital production imaging products, both mono and color, cutsheet and continuous feed. The services provides essential market information for imaging product manufacturers, channel partners, managed service operators, supplies vendors, paper vendors, and investment houses, helping them identify opportunities, position products/brands, and anticipate future requirements in this burgeoning market.

Technology Coverage and Data Segmentation

This tracker provides total market size and vendor shares for the following technology areas and segmentations. Measurement for this tracker is in shipments and end-user revenue.

Technologies and subtechnologies:

- Device type: printer, MFP, single-function digital copier
- Technology: monochrome laser, color laser, highlight color, high-speed color systems
- Paper class: cut sheet, continuous feed

Segmentations:

- Speed range: mono laser 70–90ppm, mono laser 91–150ppm, mono laser 151ppm or more, high-end color systems <80ppm, high-end color systems 80ppm or more, highlight color all speeds, color laser >40ppm
- Product classes: office, light production, midproduction, production

Geographic Scope

- Central and Eastern Europe: Czech Republic, Poland, Russia, Rest of CEE
- Middle East and Africa: Turkey, Israel, Saudi Arabia, UAE, South Africa, Rest of MEA

Delivery Schedule and Deliverables

This tracker is delivered on a semiannual basis with tools such as Excel pivot tables. The delivery schedule for this tracker is as follows:

- Preliminary historical data: week 5 after period closes
- Final historical data: week 6 after period closes

IDC's Tracker Methodology

IDC's tracker data is developed using a rigorous methodology that includes well-planned and well-coordinated local, regional, and worldwide data cross-checks combined with a proprietary advanced data consolidation and analysis data platform managed by IDC's Worldwide Tracker organization. Data sources used in the process of determining IDC's tracker numbers include, but are not limited to:

- In-country local vendor interviews
- Distribution data feeds
- Worldwide and regional vendor guidance
- ODM data
- In-country local channel partner discussions
- Import records
- Feedback from component suppliers
- Vendor briefings and public financial reports

Enabling Better Business Decisions Across the Organization

IDC trackers provide the accurate and timely market size, vendor share, and forecast information you need to identify market and product expansion opportunities, increase revenues, and win market share. IDC's tracker research is a critical input to the planning and monitoring cycles of the business process. Common uses of the tracker data include:

Planning Process

- Regional planning — setting regional and country sales targets based on market opportunity
- Product marketing — creating a product strategy and road map based on currently available product features and expected growth
- Production planning — using customer demand data as an input in the creation of production schedules
- Product portfolio planning — accessing accurate and detailed data as an input into the product development process

Monitoring Process

- Performance measurement — comparing vendor performance on prior fiscal periods
- Competitive analysis — reviewing competitor performance across multiple dimensions: product, features, channel, segment, geography
- Sales forecasting measurement — assessing internal sales forecast versus actual results
- Price benchmarking — comparing vendor versus market pricing data by model
- Marketing communications — using positive results for messaging in the press, at partner events, or in sales collateral
